

National policies and plans where Environment, climate change and disaster statistics and indicators are required

Saint Lucia's Climate Change Policy Framework

International & Regional Framework

International

- Saint Lucia ratified to UNFCCC: 1993
- Kyoto Protocol & Doha Amendment: 2003 & 2018
- Paris Agreement: 2016

Regional

- Regional Framework for Achieving Development Resilient to Climate Change; Implementation Plan for the CARICOM Regional Framework for Achieving Development Resilient to Climate Change (2011-2021)
- Saint George's Declaration 2040
- Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean (**Escazú Agreement**)

National Framework

- National Environment Policy (2004/2014)
- National Environmental Strategy (2005/2014)
- SLU Climate Change Adaptation Policy (2015)
- Nationally Determined Contribution (updated 2020)
- **National Adaptation Plan (2018-2028)**

National Framework

National Work Further Guided by:

- 2030 Agenda for Sustainable Development (SDGs – 13)
- Medium-Term Development Strategy (2020-2023)
- **Sectoral Adaptation Strategy & Action Plans (2018-2028)**
- Coordination: National Climate Change Committee

Monitoring and Evaluation Plan of Saint Lucia's National Adaptation Planning Process

- It is expected that aside from the annual monitoring and evaluation of NAP progress, **the NAP and SASAPs will be reviewed overall at least once during the 2018-2028 period**
- Ideally, two reviews should occur: in 2021 (end of the period prescribed for initiating the implementation of short-term activities); and in 2024 (end for medium term activities)

INDICATORS for M&E– NAP & SASAP

Questions to measure progress for the period from 2018 – 2021	
1	Were you involved in the formulation and / or implementation of a SASAP for your sector/area between 2018 – 2021? If so, which one(s)?
2	Has yearly SASAP monitoring and evaluation reporting been conducted? If not, please explain why.
3	Has / have these SASAPs been updated or reviewed to date, including addition or modification of concept notes? If so, please provide input on the results, including any sectoral / area refinement, new or modified concept notes, as well as other outcomes and recommendations.
4	What proportion of major programmes and projects approved between 2018 – 2021 explicitly include climate considerations relevant to the SASAP(s) with which you are involved? Please list them.
5	What proportion of all legislation, policies, strategies, plans, standards, guidelines, criteria, etc. drafted or reviewed between 2018 – 2021 explicitly include climate adaptation considerations relevant to the SASAP(s) with which you are involved? Please list them.
6	What number of sectoral adaptation measures included in the SASAPs were

	initiated during the period from 2018 – 2021? Please list them.
7	What is the total number of sectoral adaptation measures (included in the SASAPs) initiated between 2018 – 2021 that are ongoing , but will be not completed by the end of 2021? Please list them.
8	What is the total number of sectoral adaptation measures included in the SASAPs in the period between 2018 – 2021 that have been completed ? Please list them.
9	Please identify the cross sectoral adaptation measures ¹ included in the SASAP between 2018 – 2021, and their state of progress, i.e., initiated and ongoing (anticipated completion date) or completed (date of completion).
10	Please identify the incorporation of the following as they relate to the SASAP(s) with which you are involved: <ul style="list-style-type: none"> • Vulnerable groups specifically targeted by the SASAP; • Gender-specific measures;

- | | |
|----|---|
| 11 | Please identify any sectoral or cross sectoral climate actions, relevant to your sector, outside of the SASAPs for your sector/area, initiated, ongoing or completed between 2018 and 2021. |
| 12 | Please list funders and amounts, where appropriate, secured for climate action in your sector between 2018 – 2021. |

INDICATORS for M&E– NAP

Questions to measure progress for the period from 2018 – 2021

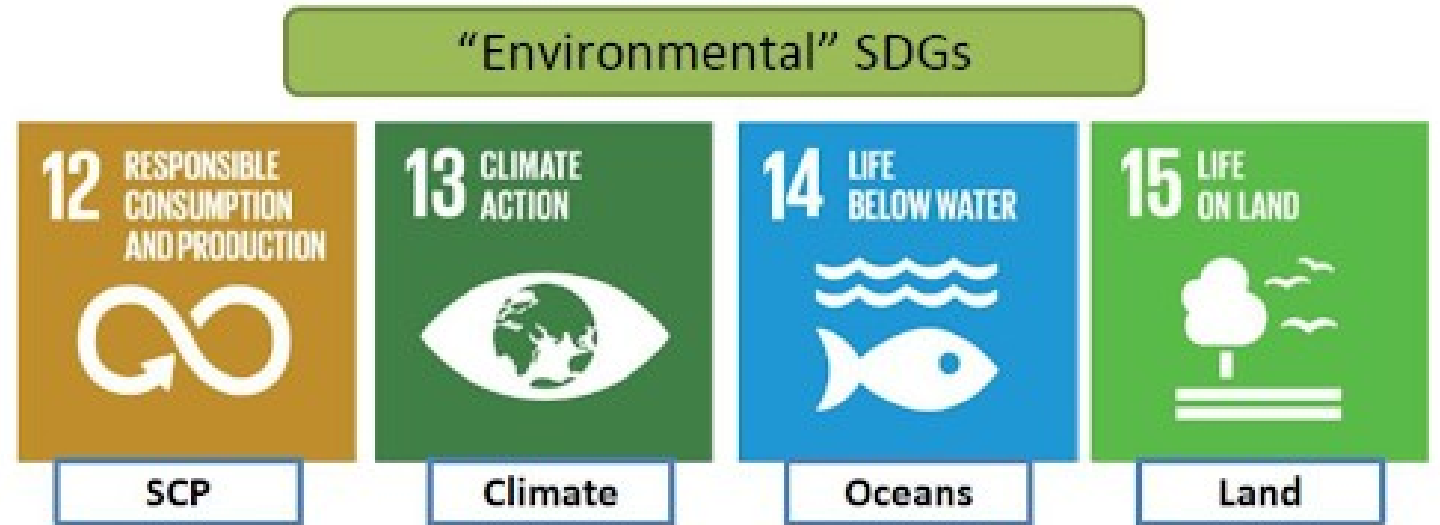

- 1** Were you involved in the formulation and / or implementation of the NAP between 2018– 2021? If so, which one(s)?
- 2** Has yearly NAP monitoring and evaluation been conducted, specific to your sector? If not, please explain why.
- 3** What proportion of major programmes and projects approved between 2018– 2021 explicitly include climate considerations relevant to your sector/area? Please list them.
- 4** What proportion of all legislation, policies, strategies, plans, standards, guidelines, criteria, etc. drafted or reviewed between 2018– 2021 explicitly, relevant to your sector/area include climate considerations? Please list them.

National Data and Indicator for Reporting

- Reliable, accessible, consistent, shared, central data source and combined with other data for reporting on progress
- Agendas and protocols: Agenda 2030, S.A.M.O.A. Pathway, National SOER, Montreal Protocol, Basel and Stockholm Convention, Cartagena Convention and LBS Protocol, Escazú Agreement and many other Multi-lateral Environmental Agreements (MEAs)
- Reporting on MEAs:
 - Common Data Storage Facility (CDSF),
 - National Environmental Information System (NEIS)
- UNFCCC, UNCBD, UNCCD
- <https://www.neis.govt.lc>
- MOU with data curators until December 31, 2030
