Objectives, outcomes and dynamics

Georgina Alcantar, Chief of Environmental Statistics and Climate Change Unit

Statistics Division / Economic Commission for Latin America and the Caribbean (ECLAC)
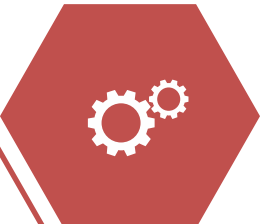

Objectives

Build selected environment, climate change and disaster indicators and its metadata.

Identify data and capacity gaps to develop an Environmental Information System (EIS) and build a regional resilience platform.
Have a better understanding of how geospatial data can enhance the use of environment, climate change and disaster indicators for effective decision making.

Expected outcomes

At least three prioritized climate change and disasters indicator and its metadata are available at the end of the workshop

A selection of prioritized indicators from the Global Set of Climate Change Indicators are identified for Saint Vincent and the Grenadines

Follow up steps to build further selected climate change and disasters indicators are agreed

Dynamics (by groups)

- **Demand and priorities of indicators in the policy-making process**
Objective: Identify the status of the demand for statistics and indicators along the policy cycle for three main national climate change and disaster issues

- **Dissemination and sustainability of the new indicators: challenges & potential solutions**

  Objective: Identify the main challenges and enablers associated with the dissemination and sustainability of the new indicators built during the workshop
- **Choosing the indicator to be built during the workshop based on the Global Set of Climate Change**

  Objective: Please select the indicator you would like to work with during the workshop

Building selected environment climate change and disasters indicators with national data

Various groups will be created
Worked with at least 3 indicators from each of the UNFCC areas

The participants are public professionals, producers and users of environmental statistics.

Enriching technical discussions are expected around the exercises.

Group Work Methodology

1

Fill the Excel file with tasks related to the indicator to be developed.

2

Fill out the methodological sheet with all its details

Group feedback on the indicators build

Make representation with charts and graphs of the indicator results

3

Make the presentation of the indicator for the final discussion

4

Thanks for your attention
